

## GRANDE PLASTER

Built with style, GRANDE PLASTER offers high visual comfort through the use of a centered perforated basket lined with an opal membrane. The cleverly designed back reflector is awash with light whilst lamp positioning still provides ample controlled downward light through the primary perforated diffuser. Manufactured to enable easy lamp change through a hinged bracket system on either side of the basket.

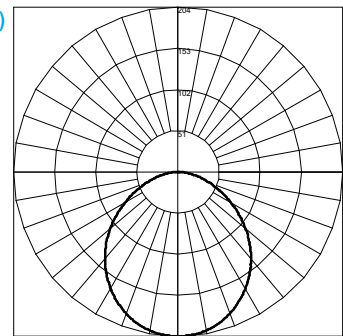

GRANDE PLASTER is wired complete with electronic (A2) ballast, colour 840 triphosphor lamps and 1.5m 3 core 3 pin flex and plug. Single and twin versions available.
